

ADAN GUZMAN

I am running for the Centralia Board of Education because I can apply my previous knowledge and experience to continue making the district a success. I have firsthand interest in a successful district because my daughter attends school in the district. I present a unique perspective because while serving as a US Marine I was exposed to a vast variety of cultures that range from the Middle East, Asia, Mexico, Europe, east/west of the United States. My career has been in aerospace engineering where I sought to think outside the box and identify where there was room for improving design for better quality while driving down cost. As a Marine, I was in a leadership position to coordinate the movement of troops into the middle east which required precise logistical knowledge, ensuring proper training, equipment, and accountability of all personnel where failure was not an option for the American people. I view the privilege of serving on the Centralia Board of Education as important because it involves making decisions to ensure the best future for our kids. I currently serve as the chairman of the school council at Miller Elementary. I look forward to serving the American public once again.
